Subject: [timingsolution] Upgrade December 28

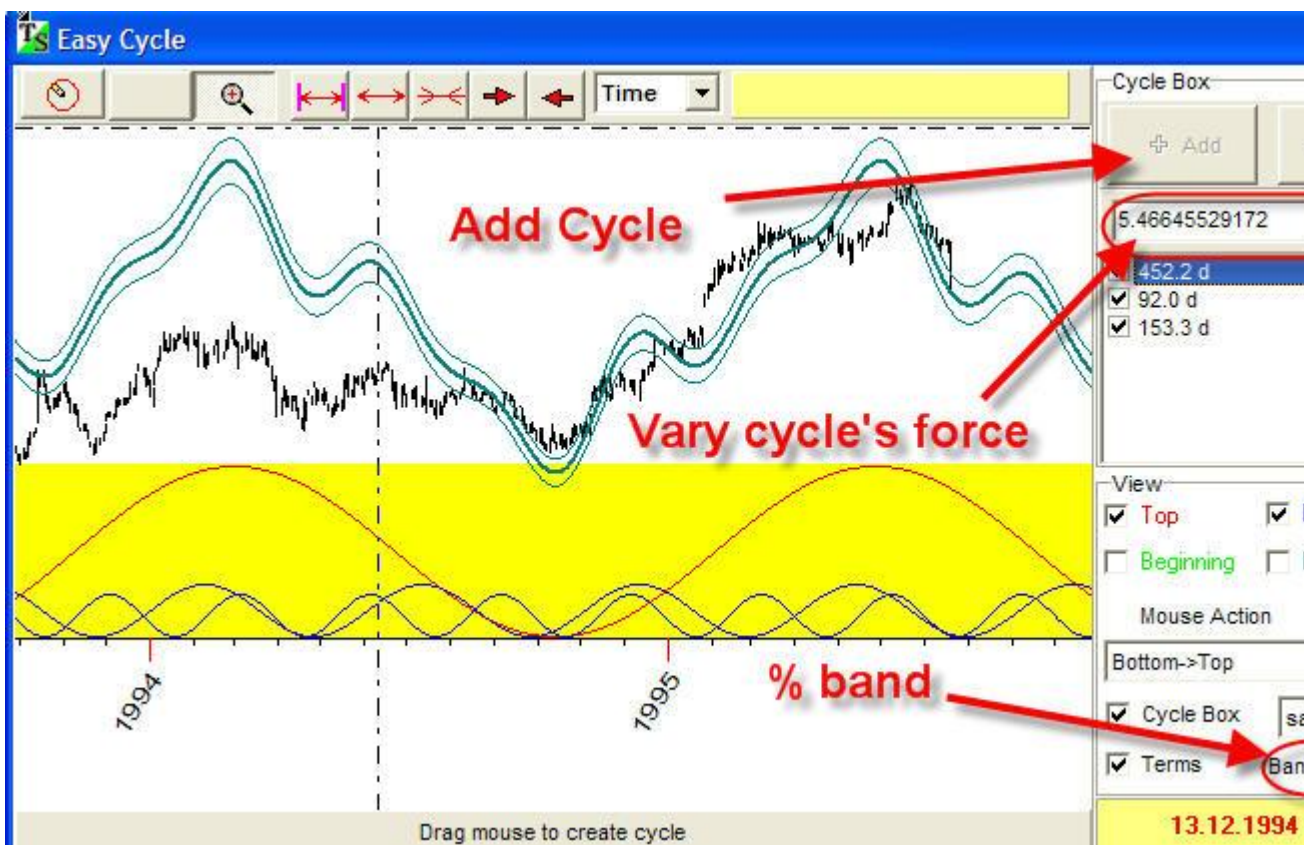

Hello, Group

The new upgrade (December 28) is ready.

According to my To do list, I have done the addition to Easy Cycles module (Tools -> Easy Cycle). Its purpose is to create quickly the forecast based on cycles, in easy way, without bothering with Spectrum analysis.

As before, you can draw these cycles right on the price chart and then add them to the Cycle Box.

When you draw a cycle, click on the "Add" button to add it to the Cycle Box:

It is possible also to create not just one cycle, - a band.

I need a little bit more time to do the detailed description of this module. And I need to make a possibility to combine this module with Spectrum as well.

New users who joined recently can find the basic description of this module here (I did it a half a year ago):

http://www.timingsolution.com/TS/Study/Easy_Cycle/e_c.doc

Best regards,

Sergey
