 Subject: [timingsolution] Spectrum again

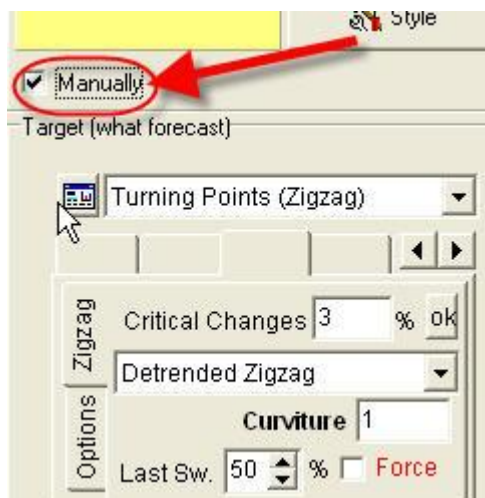

Hello, Group

I will explain here how to do the model based on triangle waves through fast solutions. This is the info for new users, more experienced can skip this e-mail.

1) Run Fast Spectrum Solution:

2) Set Manually ON. Also as a target (what to forecast) try to use detrended zigzag as it is more oriented to catch turning points:

The explanation regarding detrended zigzag can be found here:
http://www.timingsolution.com/TS/Uphistory/u_5.htm

3) Set triangle wave instead harmonic wave:

4) Extract cycles and put them into clipboard:

5) Now the Neural Net will work with triangle waves.

Best regards.
Sergey.
