Subject: [timingsolution] SQ9 - upgrade Jan. 8

Hello, Group

The upgrade (Jan. 8) with modified Square of Nine (SQ9) is available.

These are the changes:

1) The "Height-Width" option allows to display the chart as a real square (though this presentation view takes more room).

2) Setting "Angle" option ON, the program will point out the value for the angle corresponding to the cursor's position.

3) The new feature, "Shift", allows to shift planetary positions. Thus varying this parameter you can set the planetary line to any chosen point (I set it on 263). Therefore, other planetary lines will point out the potential turning points (as I have read in books).

Best regards.
 Sergey.
